Our Services

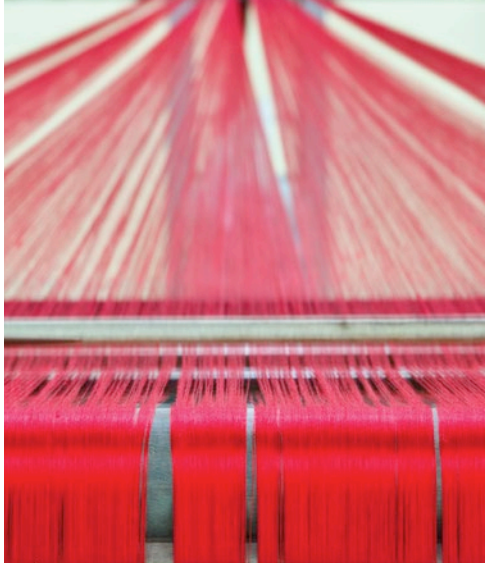
3

Full One-Stop Service

with assured quality and timely delivery

- Fabric Development
- Garment Manufacturing
- Dyehouse
- Supporting Services

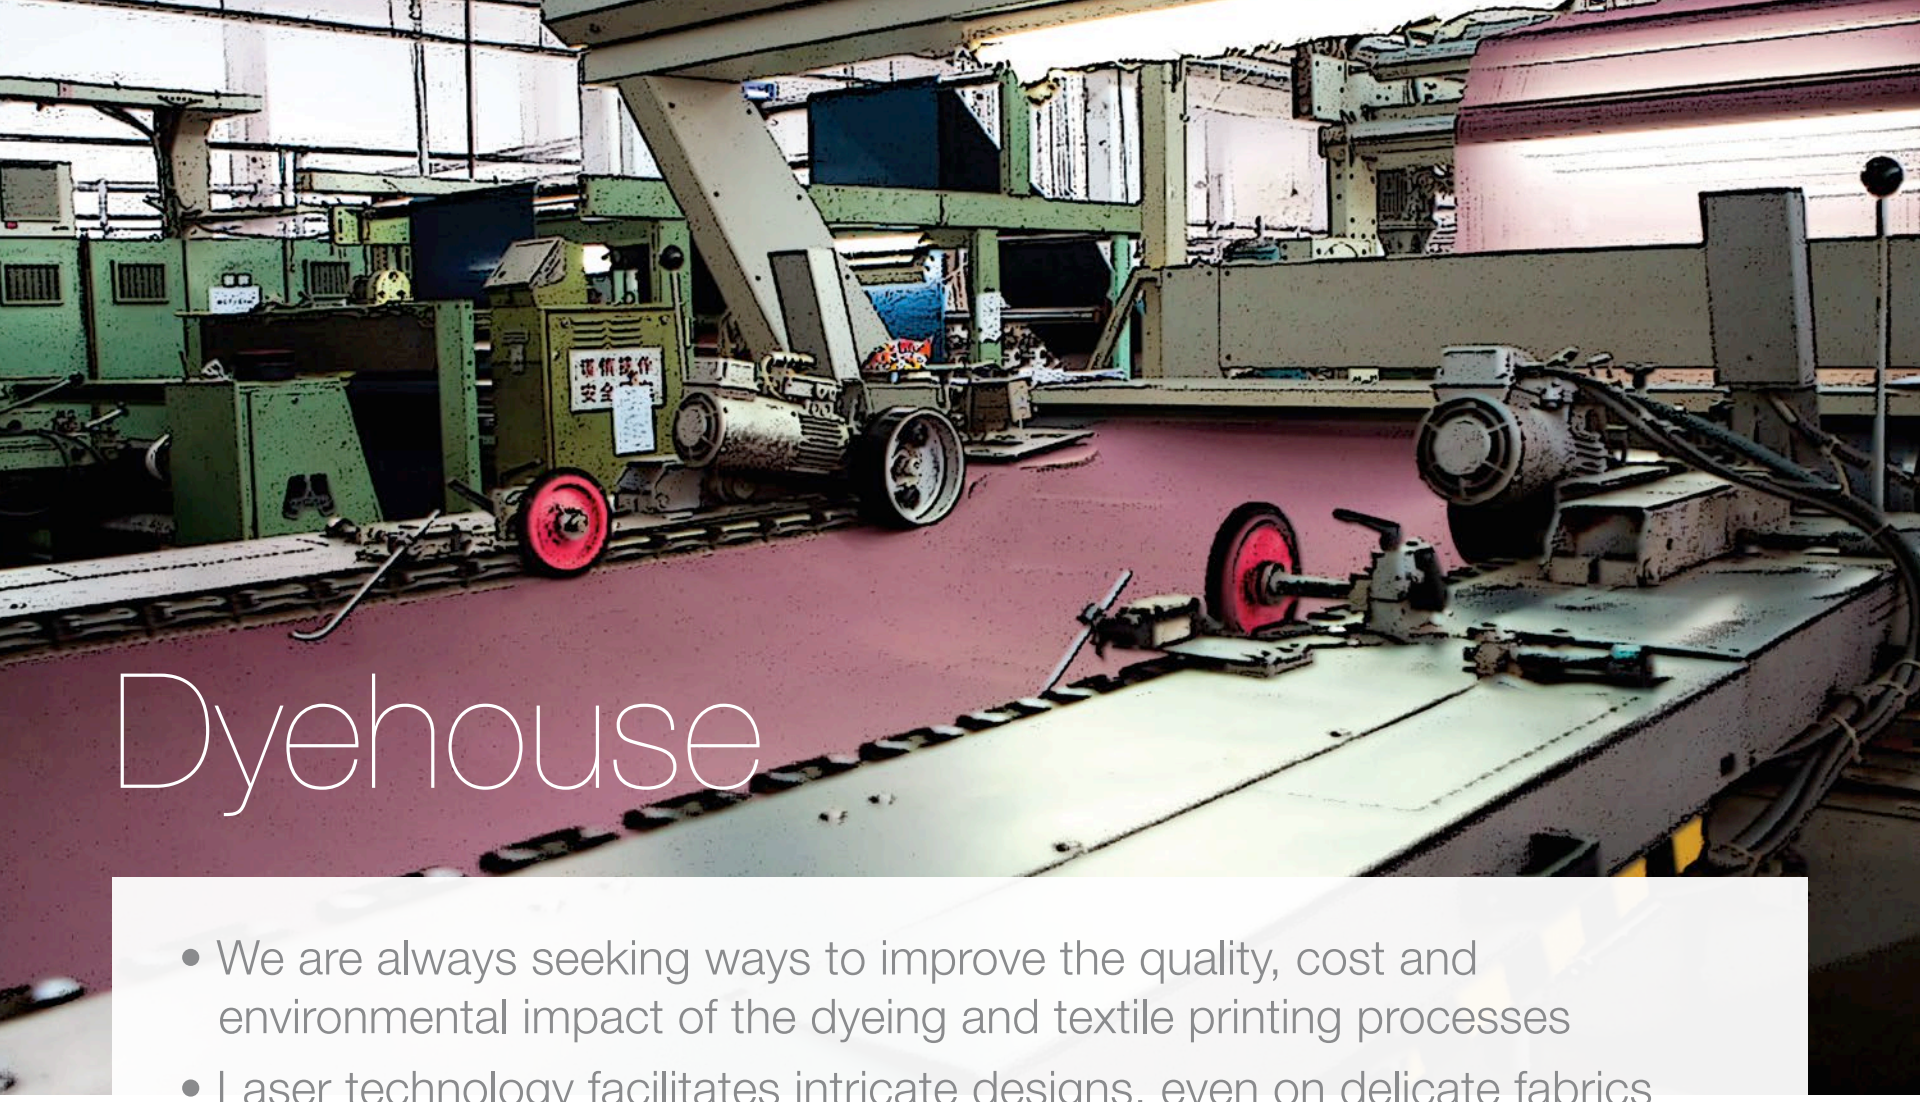
Fabric Development



- Fabric sourcing – tailored to your tastes and preferences
- Wide range of diverse fabrics to assure fitness for purpose – our R&D team is always seeking out new types of fabric
- Our own technical teams monitor mill production and testing at every stage
- Advanced production facilities ensure top quality for both woven and knitted fabrics

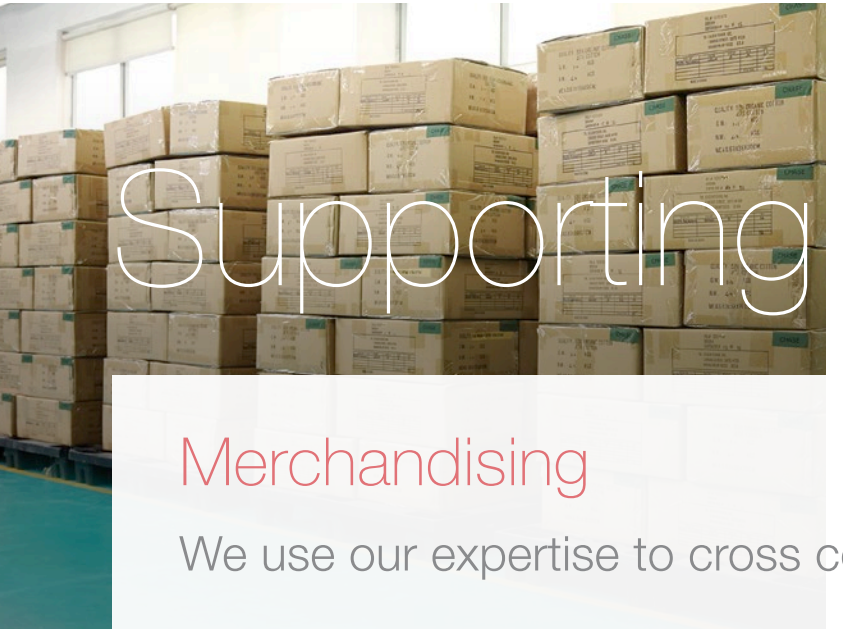
Garment Manufacturing

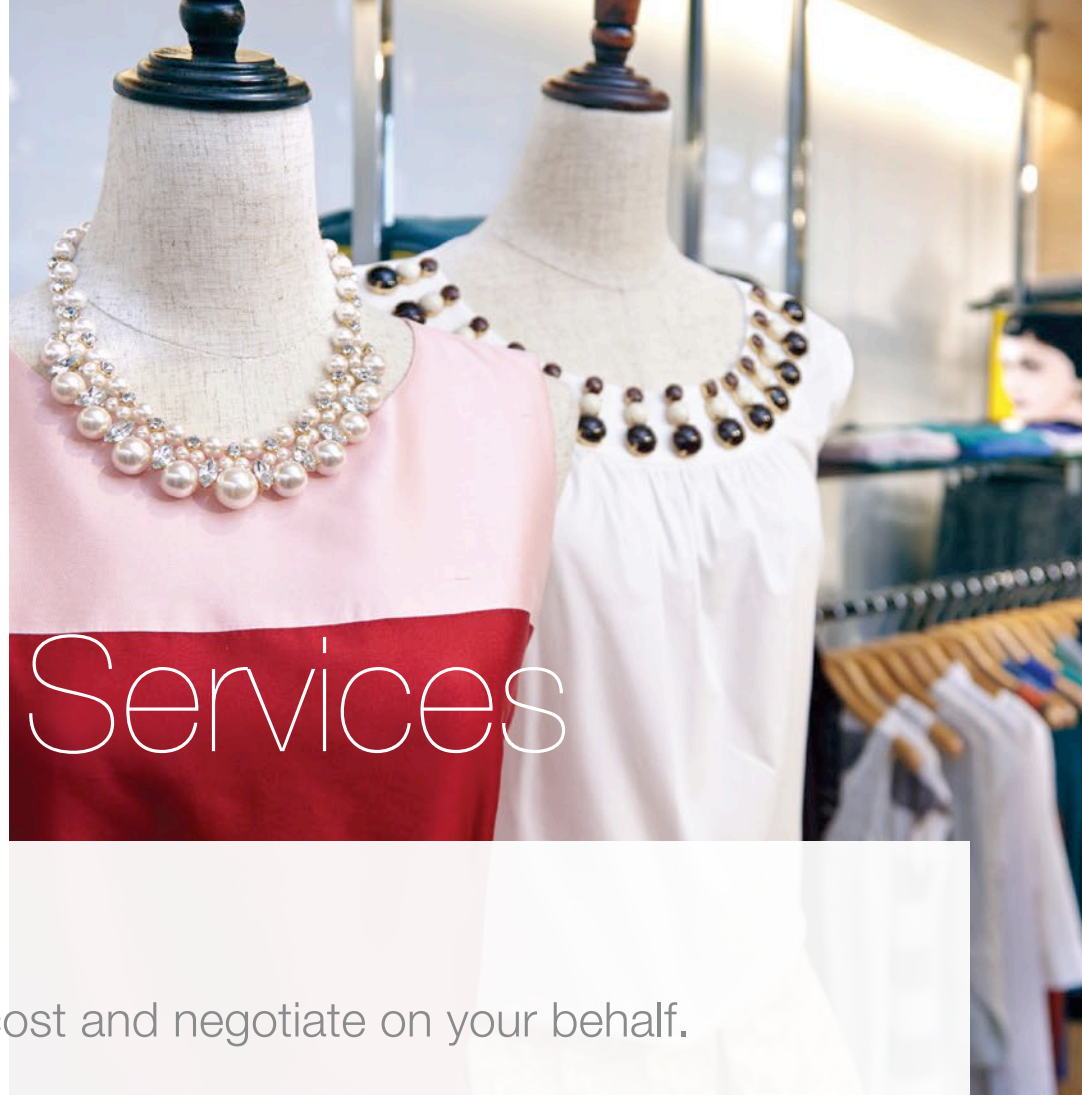
- Cutting/Sewing – state-of-the-art machinery and skilled workmanship ensures consistently high standards
- We invest in advanced plants capable of crafting the finest high-end textile products
- Quality is our highest priority



Dyehouse

- We are always seeking ways to improve the quality, cost and environmental impact of the dyeing and textile printing processes
- Laser technology facilitates intricate designs, even on delicate fabrics
- We have particular expertise in treating silk
- The region's soft water creates superior fabric colours
- Stable and accurate colour across the whole spectrum





Supporting Services

Merchandising

We use our expertise to cross cost and negotiate on your behalf.

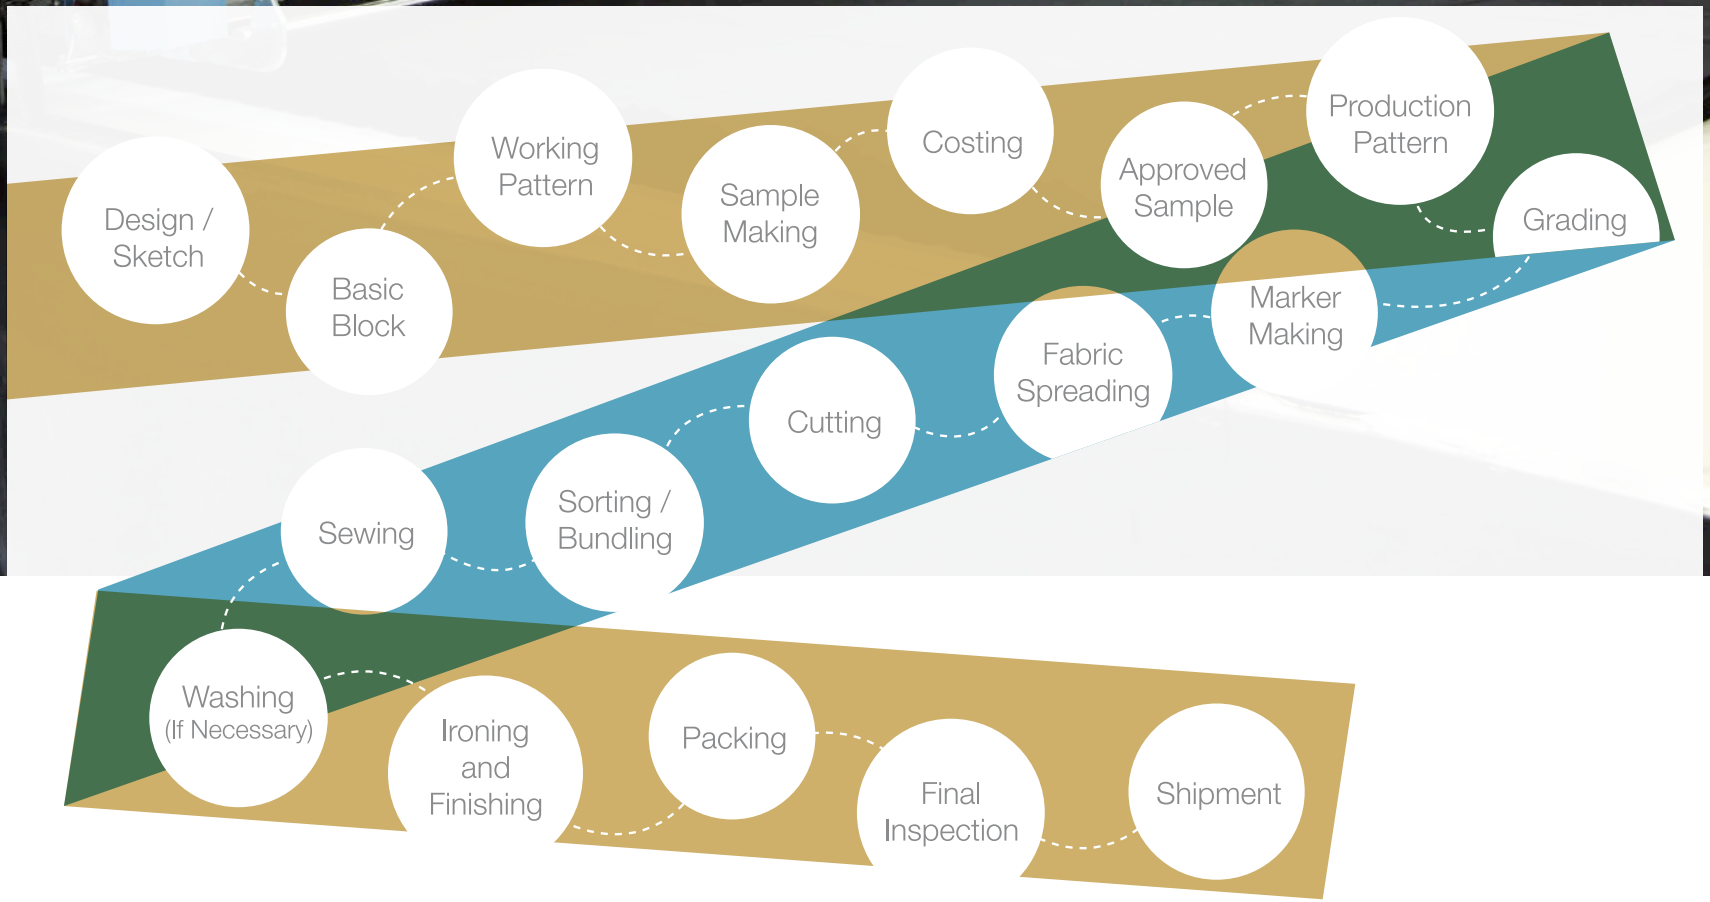
Logistics

Getting your garments to market at exactly the right time – anywhere in the world.

Production Process

4

Our Production Process



Productivity Control System

E-factory – electronic factory management system

- Transparent production process – easier to monitor; generates accurate statistics
- Real-time production control
- Speeds up production and increases productivity
- Environmental benefits: reduces rework and wastage; paperless system
- Strengthens internal communication

Efficient Production

- Energy-efficient production machinery
- Minimize materials wastage
- Reduced materials input
- Reduced pollution output
- Use of automation to speed up processing
- Skilled and experienced workforce

Advanced Technology

5

Advanced Production Equipment

We invest in the latest and most efficient machines and equipment for:

- Weaving
- Dyeing and washing
- Fabric inspection/checking
- Laser cutting
- Pattern making
- Eco-friendly and automatic sewing
- Steam ironing

Benefits of Advanced Equipment

- Standardized and enhanced accuracy and production quality
- Simplified operation
- Reduction in defects, rework and wastage
- Increased production capacity (approximately 20%) and productivity; reduced manpower needs

Benefits of Advanced Equipment

- Compact machines with smaller footprints improve factory space utilization (by over 15%)
- More energy-efficient – 40% lower electricity consumption; in addition, lower heat radiation reduces air conditioning demand.
- Environmental benefits – overall carbon emissions reduced by approximately 40%

Environmental and Social Responsibility

6

We Care about Our People & Our Environment

Minimizing Our Environmental Impact

We manage our operations to consume fewer resources and generate less waste/pollution, contributing to environmental sustainability

- Efficient Production
- Energy Saving
- Working with Nature
- Recycling

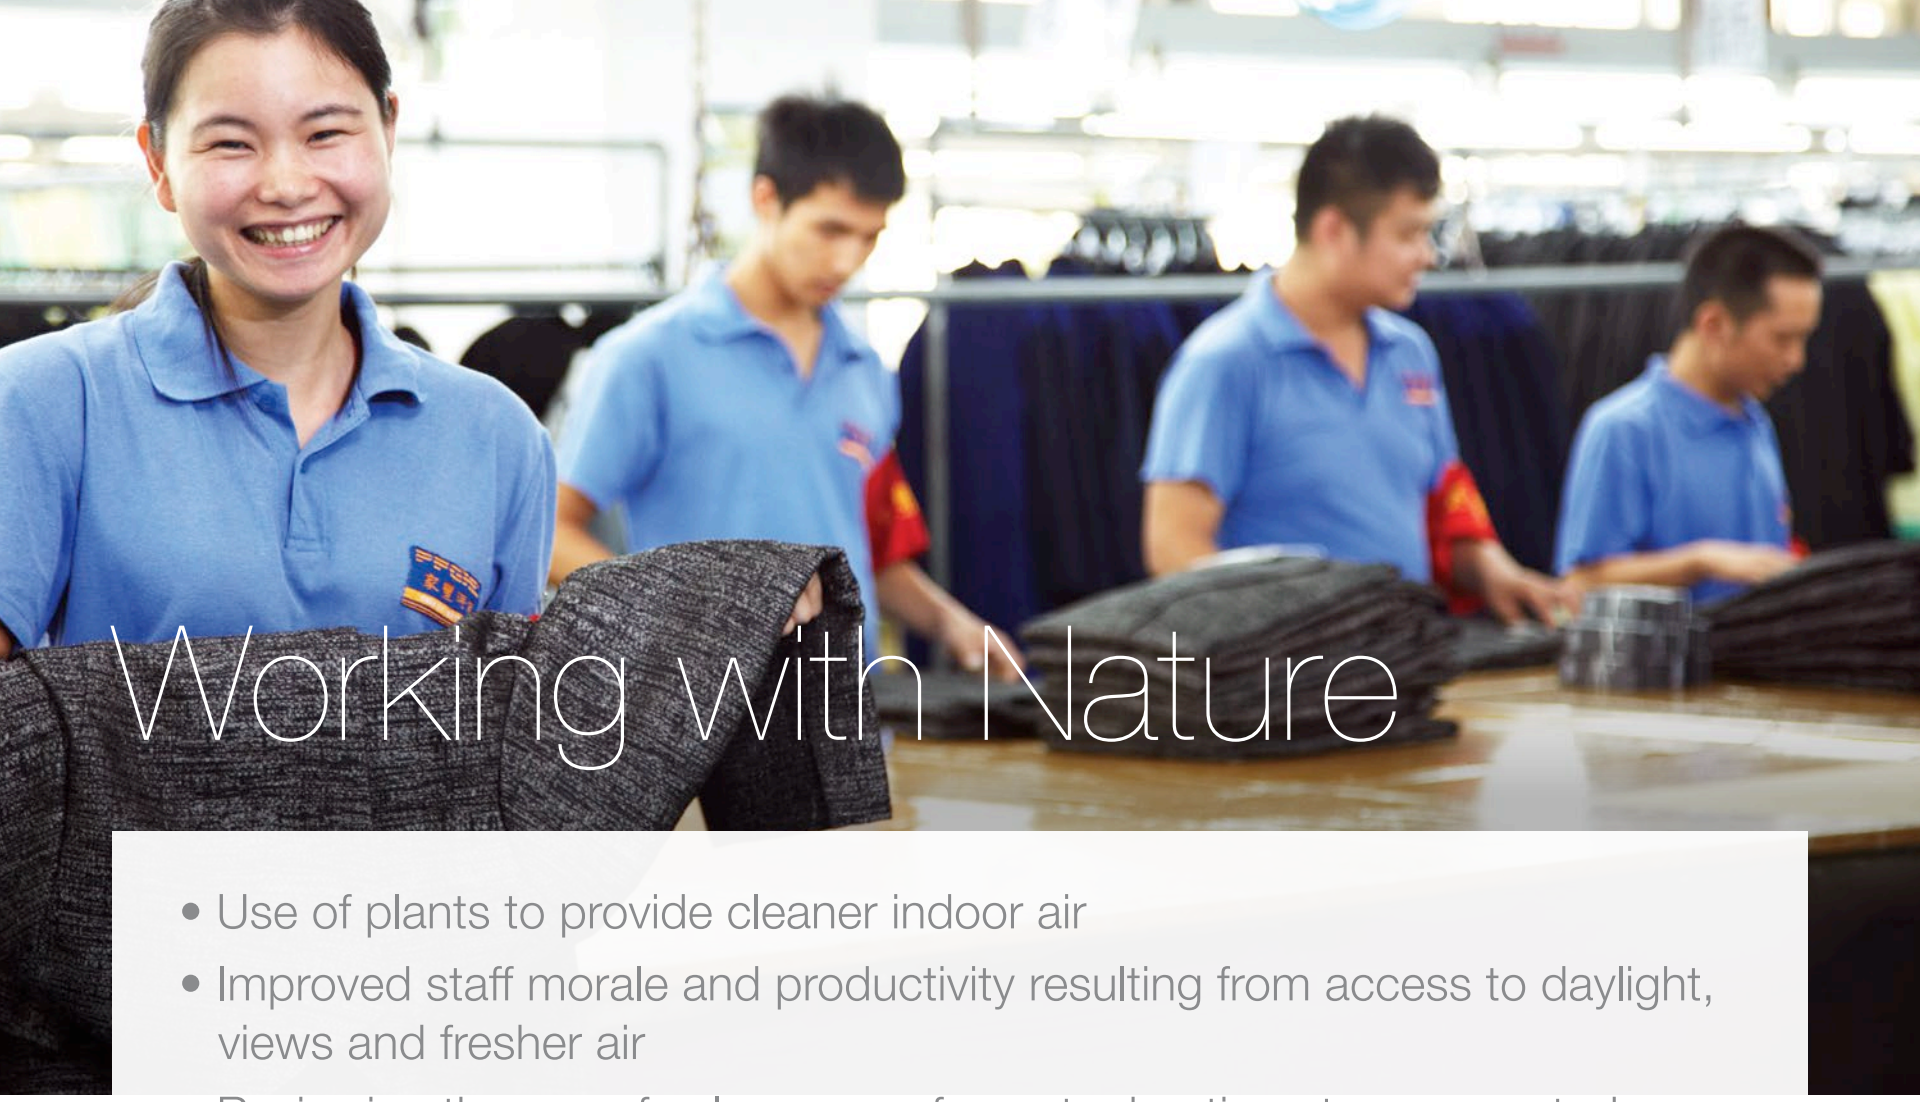
Caring for Our People & the Community

We recognize and appreciate the efforts of our employees and other stakeholders, and care for their well-being

- Compliance and Certification
- Care of Employees
- Rewards and Recognition
- Community Service

Energy Saving

- Energy-efficient production machinery
- High efficiency lighting
- Use of natural light where possible
- Advanced water-cooled air conditioning
- Reduced carbon emissions



Working with Nature

- Use of plants to provide cleaner indoor air
- Improved staff morale and productivity resulting from access to daylight, views and fresher air
- Reviewing the use of solar energy for water heating etc. – expected saving on power consumption 20%
- Reviewing the possible collection, purification and reuse of rainwater to reduce water consumption by 20%

Recycling

Collect, sort, clean and reprocess various materials to reduce waste:

- Waste paper
- Rags and fabric scraps
- Wastewater
- Plastic
- Metals
- Biodegradable materials such as food and garden waste

Fair Treatment of Workers

Our employee management systems ensure that our workers receive adequate compensation and fair and legal treatment. This enhances occupational health and safety, earns customer recognition, and helps retain a stable workforce, which in turn means a more skilled and experienced one.

Other CSR Initiatives

Equal Opportunities – hire and train the handicapped.

Recreational Activities for employees.
